GRAFISK DESIGNER I TYPOGRAFI

2005 - 2011 selskap: Graphic and Printing

My experience as a graphic designer in a printing house has been complex and interesting. Over the years, I have had the opportunity to work with different clients, tackle diverse projects, and explore different aspects of typographic design. Here is a description of my experience: As I developed my knowledge, I started to get involved in more complex projects, such as book, magazine, and catalog design. This exposed me to the challenges of managing workflow, choosing the right fonts for different types of content, and ensuring visual consistency throughout the publication. I learned to pay attention to details, maintain a balance between text and graphics, and find creative solutions to effectively communicate the client's message. An important part of my experience was working closely with the printing house, including printers and press operators. I learned to understand the printing process, adapt designs to technical requirements, and communicate with colleagues to ensure optimal quality of the finished products. As technology evolved, I also began to explore design for digital media, such as creating graphics for websites, social media platforms, and mobile apps. I learned to adapt my designs for different resolutions and take into account user interaction in the online environment. This helped me become a more versatile and experienced designer.

PHOTOGRAPHER AND VIDEO CAMERAMAN

2000 - 2011 company: Cordo Image, Romania.

Photographer and cameraman with experience in capturing and editing high-quality visual material, specializing in events, portraits, commercial projects and promotional videos. Solid technical skills in using professional photo and video equipment, managing lighting and composition, as well as in post-processing with software such as Adobe Photoshop, Lightroom, Premiere Pro and After Effects.
